

Tranås / Stockholm 2018-10-08

Best Customer

During mid-September, OEM International acquired all of ATB Drivtech AB. By November 1, 2018, ATB Drivtech AB will be integrated into OEM Motor, which means that OEM Motor will be the new channel for the business you previously had with ATB Drivtech.

Together we will be able to offer a comprehensive product range of engines. In addition to that, there are gears, gear belts, and gears traps in combination with a full range of linear products and a strong program of frequency converters.

As a customer of ATB Drivtech or OEM Motor, you will have unchanged terms of conditions after the merger. After October 22, you send the purchases to OEM Motor, which will then handle and be responsible for the entire process. Johan Sahlsten, former owner of ATB Drivtech, will remain in business until the end of the year.

In the future we will be able to offer deliveries from one company with improved support for you as a customer, which will give you access to our entire product range.
