

# VTEX AXELKOPPLING JAW

Elastomer / klokoppling

VTEX 65 G

Kopplingsgummi VTEX/ROTEX

- Gjutjärn eller aluminium
- Förborrade eller Taper Lock
- Vtex / Trasco / Rotex

## Produktbeskrivning

Vtex vridflexibla axelkopplingar är elastomerkopplingar som har en kompakt design.

Trots låga vikter hos elastomerkopplingarna kan de överföra höga vridmoment.

De kompakta axelkopplingarna kännetecknas av lång livslängd och goda driftsegenskaper och kan kundanpassas enkelt.

Tack vare elastomeren (elastomerspindeln) mellan kopplingsnaven på axelkopplingarna dämpas stötar respektive vibrationer i driften.

CAST-IRON GG25		STEEL*	
INTERPRETATION CODES			
EXAMPLE: GE-T 19A-24B = HUB A + HUB B GE-T 19A-24B = HUB B + HUB A GE-T 19A-19A = 2 HUB A GE-T 24B-24B = 2 HUB B			
The characteristic size of the coupling is defined by the maximum diameter bore.
